

Court's New Case Management System

Did you know that the court is implementing a new Case Management System in early November 2014? We will be using the Tyler-Odyssey System.

Merced Superior Court will be the 3rd court in California to use the Odyssey Case Management System. Twenty-two California courts will be up and running within the next 2 years which will serve 27 million residents in the state! There are multiple counties in several other states using this Case Management System already.

E-filing is expected to be available in approximately three months afterwards.

What does this mean? We are going paperless. This means that you will have access to E-filing without leaving your office or home. There will be a public portal available via the web so that you can have access to case information at your very own fingertips!

Stay Tuned,

Merced Superior Court
